

HORIZONTAL BISECTOR

CUT FRESH OR FROZEN BREAD IN HALF FOR
YOUR SANDWICH ASSEMBLY LINE

The Horizontal Bisection cuts bread products horizontally into halves, and then transfers them to your sandwich assembly line for processing. With the Horizontal Bisection, you automate and control an additional step in your operation, increasing output and safety while ensuring consistent quality at a lower cost than pre-sliced products. It is available in a single-lane model for frozen sandwiches and a two-lane model, ideal for fresh sandwich lines.

- Slice up to 100 pieces per minute, per lane
- Single-lane (frozen) and two-lane (fresh) systems available
- Quickly and easily adjust cut heights for a variety of bread products, including rolls, biscuits, bagels, buns, croissants and paninis
- Can cut in temperatures as low as 20-32 degrees F to handle fresh and frozen products (see model specifics on back)
- Disposable AccuBand® band blades provide optimal quality, consistency and yield while eliminating resharpener and simplifying clean-up

COMMON FOOD APPLICATIONS

Bread
